Orvi

collection

A calm expectance between, glory and plain...
the universal voice of genuineness...
the biggest search for the taste...

A product that creates itself in contrasts...
The meeting of simplicity with an equivalent soul...
a common language that tells it's story with it's
purest form...

Common language...

Orvi originated from this common language...
Each piece in the collection is designed with
consecutive harmonious lines.. The harmony
was completed by combining woodcrafts and
modern colors...

Orvi... A unique color... Magnificent harmony....

U^{collection}riah

"Simplicity" a decent magic...Quiet, calm and delicate...What is unique and variant can be described with it...
Limpid beauties, deep blues, mischievous smiles... Hosts an elegant tranquility.

The eye-catching sparkles, striking colors and fine motifs have a dignified nobility in it. It's basic action is even more effective than the most passionate.

Simplicity is a temptative style..It's glamor comes from grace, not it's magnificence.. The more simple it is, the stronger it is.

Uriah Collection is inspired by this power. The graceful combination of materials and colors is designed with modern purity.The simplicity and peace of nature, once again brought together the decoration and charm.

The soft soul at the core of the wood, has come to life once again in cushions. The finest materials are designed with smooth yet elite lines from clarity.

Uriah...Pure...Elegant...Strong...

Katalana^{collection}

Katalana has a design dna running through the collection, an elegant wooden arm detail that echoes through the range.

The Designer David Fox commented "we established that there was a definite need for a purer looking collection, that didn't ignore the classic heritage of Papell, and its end user. The idea came from when I was out walking, a wooden lollipop stick was semi submerged in soil, I remember thinking that could be a nice detail agained leather or fabric, I began playing about with the idea, giving the stick some 3d elements. The evolution came very quickly, the idea was very square at first then chamfering the base upholstery gave it a unique looking form. By doming the seat and back cushions the product began to look pure with a soft inviting look"

collection Chestar

David Fox Designer of the Chestar explained the theories behind the collection "I have always been a lover of Classic items, designs that have stood the test of time!. Every morning I take a cup of tea sat in a chesterfield armchair, and contemplate the day! There has been a revival of the chesterfield in both hotel, and corporate spaces! Papell is a brand that functions well in what I call the classic / romantic market"

"The brief for Chestar was to create something that had historical reference but brought an new more modern aesthetic, that supported Papell's brand values. My experience of chesterfields was the straighter backed ones aren't always comfortable, scrolled / curvy ones are, but in my opinion don't have the aesthetic strong presence. In the initial sketch stages I experimented with flat oval shapes, which looked strong, by adding softer back cushions to compliment the upholstery, and by bulging the seat bases, a softer yet unique look began to emerge. Considered use of pipe details framed the shapes, then slightly elevated contrasting wood rail, gave a nice, and eye-catching shadow gap detail between the floor and the product.

Both myself an Papell feel like the more modern vision that's been created can be used in a multitude of spaces, home hotel and corporate, it continues to bring innovation to the portfolio, whilst being empathetic to the companies history"

Eaton

Air, water and freedom... The basic elements of human life... The line that reaches to the freedom while breaking the boundaries of the past and the future... A courage that combines the past and future...

A perfect balance woven with contrasts... The eternal charm of the legendary beauty that reaches beyond time and space... Two opposite souls met in freedom between old and new...

This, is the extraordinary story of freedom...

Created with the passion of freedom, The Eaton Collection displays the most phonetic harmony of classical and modern lines... The design, with its movements in its details, determines the mood of the space.

The coatings used in Eaton meet the different characteristics of LOX and create an attractive harmony between classic and modern.

Different sizes of the parts within the collection produced with "Class A" material determine their place in the living space spontaneously and freely.

Eaton Collection... It offers you the freedom in the souls' of the opposites.
